

Ramsay Santé opens a new 12,000 m² health centre on the site of the Atlantic clinic in Puilboreau (17)

The group is thus transferring all the care activities of the Mail clinic, previously located in the centre of La Rochelle, to the site of the Atlantique clinic in Puilboreau.

- Ramsay Santé, one of the European leaders in private hospitalisation and primary care, is grouping its range of services in the La Rochelle region on a single, more modern and more accessible site.
- The group is thus transferring all the care activities of the Clinique du Mail, previously located in the centre of La Rochelle, to the site of the Clinique de l'Atlantique in Puilboreau.
- This project is the result of a strong desire to create a unique medical and surgical centre in La Rochelle capable of offering comprehensive and multidisciplinary care.

The **Clinique de l'Atlantique**, a medical, surgical and obstetrics (MCO) and follow-up and rehabilitation care (FCR) facility of the private hospitalisation group Ramsay Santé, is expanding to integrate the medical and surgical activities of the Clinique du Mail. The aim of this grouping is to offer patients **comprehensive and multidisciplinary care on the same site as quickly as possible**, both for routine consultations and for complex medical procedures or the monitoring of chronic illnesses.

A unique medical and surgical centre in the La Rochelle conurbation

The new Clinic brings together the initial range of treatments offered by the Clinique de l'Atlantique, supplemented by the specialities of the Clinique du Mail. A total of **23 specialities are now offered on a single site by 140 practitioners***.

Our ambition is to offer a diversified and high quality care offer that can be adapted to each patient, at each stage of their journey. This grouping also allows us to strengthen our technical platform in order to be more attractive for the recruitment of new practitioners. **Lionel Tirefort, Director of the Atlantic Clinic.**

The new facility benefits from a set of **20 completely renovated operating theatres**, a spacious and ergonomic recovery room, a brand new sterilisation unit and 135 beds and places.

In addition, in order to facilitate access to the facility, more than 50 parking spaces have been created, bringing the car park's capacity to 423. Around 50 additional spaces will be available at the beginning of 2021.

** Anaesthesia-Resuscitation, Medical assistance for procreation, Medical biology, Cardiology, Senology Centre - Breast disease, Maxillofacial surgery - stomatology, Reconstructive and aesthetic plastic surgery, Oral surgery, Orthopaedic and trauma surgery, Urological surgery, Vascular Surgery, Visceral and Digestive Surgery, Dermatology, Gynaecology, Hepato-gastroenterology, Physiotherapy, General Practitioners - Medical Home, Neurosurgery, Ophthalmology, ENT - Face and Neck Surgery, Pneumology, Radiology, Follow-up and Rehabilitation Care.*

About Ramsay Santé

After the acquisition of Capio AB Group in 2018, Ramsay Santé has become one of the leaders of the private hospitalisation and primary care in Europe with 36 000 employees and 8 600 practitioners serving 7 million patients in our 350 facilities in five countries : France, Sweden, Norway, Denmark, Italy. Ramsay Santé offers almost all medical and surgical specialties in three business areas: general hospitals (medicine – surgery – obstetric), follow-up care and rehabilitation clinics, mental health. In all its territories, the group contributes to missions of public service and to the territorial sanitary disposal, as for example in Sweden with more than 100 proximity care units.

The quality and security of care is the group's priority. As such, our group is today a reference in terms of modern medicine, especially in outpatient care and enhanced recovery.

Every year, the group invests more than €200M in innovation whether it is in new surgical or imaging technologies, in building or modernizing its facilities... The group also innovates in its organization and digitalization in order to deliver care in a more efficient way to the benefit of the patient.
