**About Ramsay Santé**

After the acquisition of the Capio group in 2018, Ramsay Santé has become one of the European leaders in private hospitalization and primary care. The group now has 36,000 employees and works with nearly 8,600 private practitioners.

Present in 5 countries, France, Sweden, Norway, Denmark and Italy, the group treats more than 7 million patients per year in its 350 establishments.

In hospitalization, Ramsay Santé offers almost all medical and surgical treatments in three areas: Medicine-Surgery-Obstetrics (MCO), Follow-up and Rehabilitation Care (SSR) and Mental Health. Wherever it is present, the group participates in public health service missions and in the healthcare network of the country, as in Sweden where the group has more than a hundred local healthcare centers.

The quality and safety of care is the group's priority in all the countries where it operates. This is why the group is today one of the references in modern medicine, especially in ambulatory surgery and enhanced recovery after surgery (ARS). The group also invests more than €200 million every year in its establishments, whether in new surgical and imaging technologies, or in the construction and modernization of establishments. It also innovates in the service of patients with new digital tools or by developing its organizations for more efficient care.
